ABOUT

Highly proficient Web Developer with a proven track record in Laravel, WordPress, and robust API development, specializing in architecting scalable web solutions. Expert in backend logic, database management, and seamless API integration, consistently delivering user-centric, high-quality digital experiences across mess management systems, e-commerce, and corporate platforms.

WORK

Web Developer | Bismillah Computer & Technology

Nov 2025 - Present

Currently serving as a Web Developer, contributing to various projects and enhancing digital solutions for clients.

- Engaged in ongoing web development initiatives, applying expertise in Laravel and WordPress to deliver robust applications.
- Collaborating on diverse projects to implement scalable and user-friendly web solutions.

Web Developer | Opus Technology Limited

Jun 2023 - Oct 2025

Led the full-stack development and deployment of complex web applications, including a police mess management system and multiple e-commerce platforms, ensuring high-quality project delivery.

- Architected and deployed a comprehensive police mess management system, streamlining meal booking, financial reporting, and food menu management, significantly improving operational efficiency.
- Developed and launched multiple high-performance e-commerce platforms and dynamic corporate websites using Laravel and WordPress, enhancing client online presence and sales capabilities.
- Integrated custom APIs for diverse sectors including healthcare and fintech, enabling advanced functionalities for appointment scheduling and financial services.
- Collaborated effectively with cross-functional teams and clients, ensuring successful project delivery and alignment with strategic business objectives.
